Upgrade Your Life

Thank You So Much for Your Purchase. Everything is Preinstalled. **Just Connect Your Device, Sign Into Wi-Fi, Click LMIR! , Click “Kodi 18.4”, and Read the 2 Very Important Rules for Streaming** while Kodi Loads Up.

Connecting Your Fire TV Device. Feel Free to Grab the Little Black Booklet from Amazon in Your Box for Instructions to Connect Your Specific Fire TV Device or Simply Follow the 3 Steps Below.

1. Connect your Fire TV

Connect one end of the USB cable into your Fire TV and the other end into the power adapter. Plug your Fire TV into the HDMI port on your TV, then plug the power adapter into a nearby outlet. Turn on your TV, then select the appropriate HDMI input.

2. **Sign Into Wi-Fi.** Click “Network Settings” to Sign into Your Wi-Fi. (or Hold Down the Home Button> Click “Settings”> “Network”)

3. **Click LMIR! and Find the Kodi 18.4 App.**  Hold Down the Home Button on Your Remote Control. Click “Apps”, Click Kodi 18.4. Kindly **Wait 2 Minutes** for Kodi to Load Each Time It Opens.

2 Very Important Rules for Streaming

1. Always Use the Back Button on Your Remote to Exit Out of Your Apps. Do Not Click the Home Button. Clicking the Home Button Leaves Your Apps or Kodi Builds Running in the Background just to Freeze Up and Slow Down Your Device. **To Exit Out of Kodi** Hold Down the Back Button on Your Remote Control From Any of the Main Screens in Kodi (like Movies, TV Shows, Sports, Etc.). Then Click Your Select Button to “Exit”. Wait 1-Minute for Kodi to Save Everything and Close. To Exit Out of Your Other Apps, Just Click the Back Button Until It Closes or Asks You if You Want to Exit. Then Click the Select Button on Your Remote to Exit Out Properly.

2. How to Force Stop a Frozen Application. Click the “Force Stop Kodi” Shortcut or Your “Fast Task Killer” App 2 Times. If the App is Still Frozen Hold Down the Play Button and Select Button on Your Remote to Restart Your Device. Worst-Case Scenario, You May Need to “Clear Cache”. **Please Only Clear the Cache if It is Your Last Resort.** Hold Down the Home Button for 2 Seconds, Click “Settings” > “Apps”> “Manage Apps”> Wait 60 Seconds for This Section to Load. Please Be Careful In Here. **Do Not** Click “Clear Data” or “Uninstall”. Scroll Down and Click the App that is Frozen>. Click “Force Stop”> “Clear Cache”> “Launch”.

This Is Not Always Your Fault. Sometimes a “Busy” or Loading Window Pops-Up at the Same Time You Click to Exit Kodi, but You Can Reduce the Odds of This Happening by 95% or More by Waiting Patiently for Everything to Load and Exiting Out of Your Apps by Using the Back Button on Your Remote Control, Not the Home Button.

****How to Get the Best Free HD Streams on Day 1?** Click the Kodi 18.4 App, Wait 1 Min. Press the Up Button on Your Remote to Scroll Up in Your Movies Section and Click “1-Click Shows”, “1-Click Live TV” etc. The Best Options Are Usually at the top of the List, but Apps and Addons Go Offline to Replace Dead Links and Process Updates so Just Start at the Top of the List and Work Your Way Down. If Your Video Freezes, You Can Try Clicking the Right Button 1 Time to Skip It Ahead 10 Seconds and Unfreeze the Stream or Try Pausing the Video for 20 Seconds to See if It Catches Up, but If it Freezes Again just Click the Back Button on Your Remote and Try the Next Link, the Next Movie, Show, or Channel on the List and If You Get 3 Bad Streams in a Row in Any App, Please Skip That App and Go to the Next App or Addon.

Each Section in Kodi 18.4 is Fully Stocked with All the Latest and Greatest Streaming Apps, Video Addons, and Streaming Websites so You Are Not Reliant on a Handful of Options. Just Skip it and Keep Streaming.

[of Kodi](#)) Click  to See Every App on Your Entire Device Categorized and Ranked.

Notice the Sports Icons towards the Bottom? Those are Shortcuts to the Best Online App Markets and Websites for Live TV, Sports. These Websites Are the Most Consistent Source Period for Free HD Content and Will Outlive All of Your Addons and Your Addons, But They Are Not the Most User-Friendly, So We Put them At the Bottom Because We Have Special Sections in Your Day 1: Freedom Build Where We Try Our Best to Make it Easier For You to You Learn How to Use These Sites. Just Click Sports Apps or Live TV Apps in Your Freedom

Build and Click “Online Steaming Apps” or “Live TV Websites” and Read Your Screen When You Feel Up to the Task. No Rush.

2. Whenever You Are Ready, click.  Feel Free to Follow the Written Walkthrough Below. Once Again, Please Make Sure You Follow the “2 Very Important Rules” Above. These Rules Apply for All Kodi Builds (and All Your Applications) because You Cannot Have 2 Builds Running at the Same Time. One Build Will Freeze Up and or Crash and You Will See Error Messages and Think Something Is Wrong. Just Keep it Simple and Remember to Let Your Kodi Build Load 1-2 Minutes and Exit Out By Holding Down the Back Button and Clicking Exit.

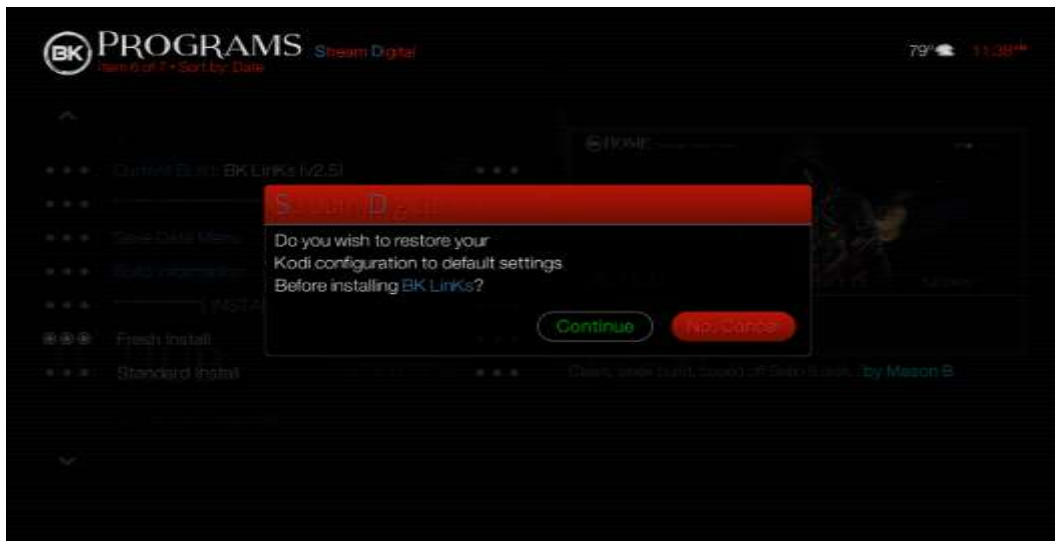

How to Update Your Kodi Build.

This is Super Simple. It is 3 Clicks, but It is Important.

1. **Click “Fresh Install” Whenever It Pops Up on Your Screen.**

2. **Next, click “Continue”.** Pay Attention to the Colors. “Continue” Is Usually Green or White. Do not Click Cancel in Red. Put down Your Remote Somewhere Safe. It is Going to Clear Off Everything and Download a Fresh New Kodi Build for You and install it. It Will Pop up 1 More Time.

3. If it Asks, Click "Force Close" in Green. It Will Force Close Kodi. Click Kodi to Open It Again and Please Wait 3-5 Minutes for Kodi to Load. It Still Has Work It Has to Do for You. IF you Ever have an Issue Updating, Click [Here](#).

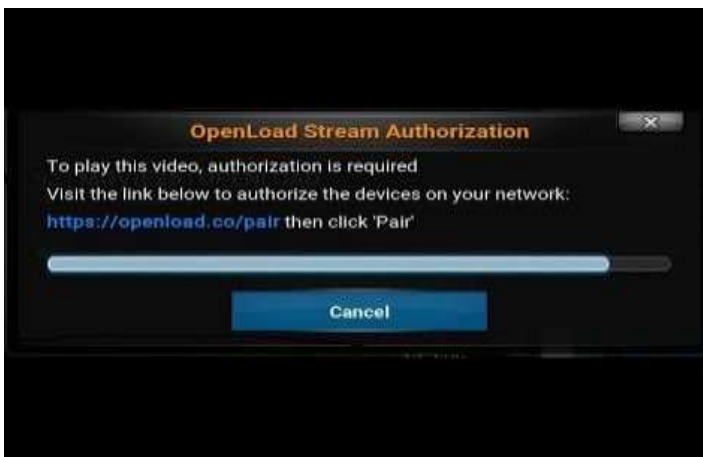

How to Find Our Walkthrough in Your Kodi "Favourites"

In Most Builds You Either Scroll Down 2 Times (2x) or Scroll Up 2x and Click "Favourites". Look for the Star Icon. In Freedom You Just Click Your Menu Button on Any Home Page in the Build. We Try to Leave Important Info in Here to Help You Just In Case, Because You Can Still Access Your Favourites Even If Your Build Update Gets Interrupted or if the Skin Gets Corrupted and you Open Up Kodi and It Looks Blank. These Links Will Not Work Forever, Because Nothing Works Forever In Streaming, but We Try Our Best to Keep These Updated and You Have the LMIR MiXplorer You Can Update Your Favourites for Most of Your Builds with Just 1 Click. Just See the Support Website Lmir.us/support for All of Our Latest Update Videos.

How to Save "Favourites" in Kodi

Click on Anything You Want. For Example, click "Networks". Select "HBO" or "Showtime" Shows. Then Scroll Down and find "Games of Thrones" or Whatever You Like, **but instead of Clicking it. Long Press it, By Holding Down the Select Button or Click Your Menu Button (the 3-Line Button)**. Scroll Down and Click "Add to Favourites". Whenever You Are Done, Just Keep **Pressing the Back Button Until You Are Back at the Main Screen, Then Click the Star Icon to Get to Your Favourites (or Long Press the Back Button in Your Day 1: Freedom Build)**. You Can Remove Anything from Your Favourites by Long Pressing it or Clicking the Menu Button (the Three Lines Button to the Right of Home). For Example, If You Do not Use Adult Addons, Click the Menu Button or Long Press the 2 Favourites at the Bottom of Your List and Click "Remove".

How to Watch Vev Streams by Pairing Up on www.Vev.io and Other Sites

Just Click the Back Button to Skip These Streams. We Deactivate Streams Like This in Kodi 18.4 to Try to Keep Them from Popping Up, but You Can Try Them in Your Other Kodi Builds. Also, If You Sign Up for [Real Debrid](http://Real-Debrid), it Automatically Pairs You to Vev and Other Pairing Sites. This is Just One of the Perks for Real-Debrid. (See “Paid Providers” Below)

1. Click [Here](#) For A Quick Video for How to Pair Up Using Pairing Sites. If You Get a Pop Up like the One Above. You Can Grab Your Phone, Tablet, Laptop, Sign Into Wi-Fi and Go to the Website on Your Screen to Pair Up.
2. Grab Your Phone/Laptop or any Other Internet Device and Sign Into Wi-Fi
3. Open Your Internet Browser (Chrome, Safari, Internet Explorer, etc.)
4. Type in Vev.io/pair or www.Vev.io/pair

6. Scroll Down and Click “Pair” if You See This Option towards the Bottom . If You Do not Want to Do This, You Can Just Wait It to Timeout, or You Can Click the Back Button to Skip These Links When They Pop Up

Finding Free Movies and TV Shows

For the Most Simple and Reliable Free Streams, We Recommend the 1-Click Movie/TV Show Sections but If You Are Ever Having a Hard Time finding a Specific Movie or Show in Kodi and You Are Sure it is Available. Try One of Your Movie Apps Like Cinema HD or Cyberflix. Most App Developers Have a Paid Version of Their App or Make Money from the Ads in Their App so They Have More of an Incentive to Find New Streams. Also, Apps Are Less Likely to Get Blocked by the Websites with the Movies and TV Shows, Because Have Less Traffic and Are Not as Well Known as Kodi.

How to Play a Movie or Show in Kodi

Take Advantage of the 1-Click Movies and TV Shows. You Will Find a Shortcut to 1-Click Movies and Shows at the Top of Nearly Playlist for Movies and TV Shows in the Freedom Build. For Example, Click “Popular Shows” or Click “HD Movies” in Your Movies Section, Select 1-Click Movies. Is Every Movie Going to Play? No, If 1 Section or 1 Addon is Not Working Well, Just Click Your Back Button and Scroll Down to the Next Option. We Include Over 20 Different Sources for 1-Click Movies and Shows and There are More In the Playlists We Have Set Up for Documentaries, Classic Films, Stand-Up, Etc.

Finding Free Movies and Shows Using Movie “Scraper” Addons in Kodi

These Are the Kodi Addons in Your “Latest HD”, “New Movies”, “Popular TV Shows” Sections in the Freedom Build.

1. Click any Kodi “Scraper” Addon. For Example, Click “Scrubs”, “Numbers”, Etc.
2. Click the Movie or TV Show Episode You Want to Watch. *Feel Free to Click the Back Button on Your Remote Control or Click “Cancel” to Stop Searching for Streams and Skip to the Results Whenever You Have Enough Streams or If You Notice You Are Just Waiting on 1 Slower Stream to Finish.
3. Click Link #1 at the Top but Pay Close Attention to Which Link Kodi Ends Up Playing. It rarely is Link #1. For Example, Kodi May Test Link #1 and Skip it. Test Link 2 and Decide to Play It.
4. If the Stream Kodi Decides to Play Buffers or Is Not Worth Your Time, Simply, Click the Back Button in Freedom or Hold Down the Back Button on Your Remote to Stop the Movie in Your Other Kodi Builds.
5. Scroll Down and Click the Next Untested Stream. For Example, if Kodi Tried to Play Link #2 like the Example Above, Click Link# 3.
6. If You Notice that There Are Several Streams That Are Exactly The Same in a Row, Feel Free to Skip Down and Click The Next Unique Stream.
7. Once You Have got this Part Down, The Next Step is to Focus in on the Second Word you See On Your Screen. This is the Name of Source and if You Get a Good Stream Try to Remember that name. Eventually You Will Start to Get Familiar with these Names and You Will Be Able to Scroll Down and Go Directly to the Streams You Like.

Want the Most Current and Specific Advice for Streaming?

See Our [Top 10 List](#), for the Best Streaming Advice About the Best Apps and Kodi Addons Today. 1 Quick Word of Advice before You Send Us a Hot and Bothered ... Please Know that the Quality of Free Streams Can Change in an Hour, Especially When You Are Streaming During Peak Hours. The Only Free Streams that Are Immune to the Laws of Supply and Demand for Free Movies and TV Shows are “Google Links”. Essentially, These Are Movies that Someone Has Uploaded to a Google Account but Google Shuts These Accounts Down All the Time so these Streams Need to Be Replaced by the App and Addon Developers Regularly. The Best Way to Find Google Links for Peak Hours is to Rotate Through Your Apps Looking for the Apps that

Have Been Updated Most Recently and The Most Dedicated App Developers, or You Can Cheat and Simply Sign-Up for a Paid Real-Debrid Account and Get Exclusive, High Quality Streams that No One Else Can Access for a Small Monthly Fee (\$3-4).

Having a Hard Time Finding the Kodi Addons from Our Top 10 List?

- Click Directly on the Word “Movies”. Click on Any Movie You Want and Click “Play” This will Allow You to Select the Addon You Want to Use (See Our “[Top 10 List](#)” for the Best Addon). Select the Addon You Want to Search for the Movie. It will Find You Links and List Them According to Quality. Click the Top Link. Once Again, Pay Attention to the Link It Plays, not just the Link You Clicked. If It Does not Play, Scroll Down and Click the Next Link. For example, If It Skipped Links 1 & 2 and Tried to Play the 3rd Link, You Would Click the 4th Link. Or Simply Try Another App or Addon. **The Quickest Way to Close Out of a Movie or Show. Press the Back Button or In Your Other Kodi Builds, Longpress the Back Button.** Otherwise it Will Run in the Background and Slow Down the Search Process.
- Movies that Are Still Playing in the Theatre May Not Be Available in HD Quality. You Do not Have to Settle for Grainy Movies. Most Movies Will Be Available in HD When You Get Close to the Golden Globes and “Oscars”.
- *Rem: If You Get a Pop Up that Tells You to Go to a Website to Enable the Movie, You Can Just Click the Back Button on Your Remote and Skip it. If It Does not Play or Buffers Click the Back Button, Scroll Up, and Click Any Other Addon at the Top, or Try Your Movie Apps Like the Cinema App.*

For TV Shows Make Sure You Are Backed Out to the Main Screen and Scroll to Your Right 1x to “Shows”. Scroll Down and Scroll to the Right. Click Any Addon In Our Top 10 List You Can Find, Scroll Down and Click “Trending” or “People Watching”. Find a Show You Want to Watch. Click it, Click the Season, and Click the Episode.

What to Do If You Get “No Streams Available”? Or Cannot Find an HD Link?

If You Cannot Find the Movie or Show Using Your Apps, Then It is Probably Not Available Yet on the Internet. This Sometimes Happens Because The Movie Database Companies Are Completely Separate from Kodi and Your Streaming Applications. They Just Update their Databases Whenever New Plot Info, Fanart, Etc. Becomes Available Period. You Really Do not Know if Anyone Has Found a Copy and Is Streaming It Until You are Actually Viewing it on Your Screen. Luckily, We Have Created a Pretty Simple Solution to Help You Avoid This Issue. Just Go to the “Latest HD” Section in Your Freedom Build. 90% of the Streams in this Section Come Directly from Our Trakt Account which is Updated Daily with All the Latest HD Movies. More Quick Tips: Scroll Down in the Latest HD Section to Find Out How to Find the Latest HD Releases Using Your Movie Apps for Higher Quality Streams. Pay Attention to the Ratings for the Movies, but Also Pay Attention to the Number of Reviews They Have

Received. For Example, If a Movie Has 10 Reviews or Less, There May Not Be Enough Demand for the Movie or It May Not Be Worth Your Time.

Other Issues You May Run Into:

1. The Film is in a Foreign Language, It Has Foreign Subtitles, It is Missing English Subtitles, Etc. Your Apps and Video Addons Search for Movies All Across the Internet, Just Like You Search for Something on Google. If a Website Has a Movie Matching the Name of the Movie You Are Searching for, Your Apps and Addons Find It and Play It Regardless of Subtitles. There Are No Guarantees About the Quality of the Video or Experience Especially if the Film is Brand-New or Still Playing in the Movie Theatres.
2. The Movie is Just an Advertisement for the Movie, Not the Full-Length Movie. Sometimes Websites Forget to Label Movie Trailers so Your Addons Will Find It and Play It, but It is Just the 3 Minute Advertisement for the Movie, Not the Full-Length Film. This is the Same Reason Sometimes The Tv Show Episodes Are In the Wrong Order. If This Happens, Simply Click the Back Button and Try Another Stream Provider, but Sometimes Things Like This Fall through the Cracks. Sometimes the Streams are In ABC Order. For Example, Episode 1 will Play, Then Episode 10 will Play Before Episode 2, because It is Sorted in ABC Order not Numerical Order. If You Catch It, Try to Pull Yourself Away from the Show and Just Hop Over and Try a Different Movie/ Show, Come Back, and Try It Later.
